

Finally, an Integrated Risk Management and Electronic Trading Solution for the OTC and Listed Options Markets

Gain Electronic Access to the OTC Commodity Option Market

- Capitalize on OTC order flow from Parity Energy's host of institutional customers
- Quote electronically across the OTC and exchange marketplaces consistently and arbitrage-free
- Identify and secure best prices across OTC and exchange markets with Metro's electronic eye and automatic response to opportunities
- Fast price discovery and constant liquidity: PEP's firm two-way markets provided on demand by liquidity providers made easy with request for quote (RFQ) feature

Execute Trades Electronically – Quickly, Safely, and Efficiently

- Make markets with early detection and automated response to user-defined thresholds and extreme market conditions; safety features to protect and warn from human error
- Price options with various models, skewing methods and graphical representations for volatility adjustments and calculations
- Display the risk associated with positions across a span of underlying prices; create "what if" scenarios; filter risk by trader or account

Comply with Upcoming Financial Regulatory Reform (Dodd-Frank Act)

- For most swap trading, the Dodd-Frank Act will establish mandatory i) execution on regulated marketplaces such as swap execution facilities (SEF), ii) clearing and iii) reporting
- The Parity Energy Platform meets or exceeds the proposed market structure requirements for SEFs today
- Parity Energy is expected to transition to a SEF in 2012

Manage Your Risk In Real Time

- Save time and effort through electronic trade execution and straight-through processing
- Quote multiple strikes on both listed and OTC markets from the same pricing engine and volatility parameters
- Leverage Parity brokers to build electronic liquidity and provide high-touch personalized service
- All PEP trades clear through CME ClearPort or ICE Clear

OptionsCity Software, Inc., is a certified vendor on Parity Energy's electronic trading platform. Capitalize on the connection today.

About Parity Energy: OTC Markets Modernized - Parity Energy (Parity) matches institutional buyers and sellers of energy and precious metals options. Unique in its category, Parity delivers the combined benefits of electronic trading and high-quality voice service through the Parity Energy Platform (PEP). PEP is Parity's award-winning electronic trader-to-trader marketplace for off-exchange cleared options. PEP combines an electronic order book, request for quote (RFQ) capability, system connectivity and full support from Parity's own voice and floor brokerage. Parity operates as an exempt commercial market and expects to transition to a swap execution facility in 2012. Learn more at www.parityenergy.com

About OptionsCity: As developers of the popular Metro electronic trading and market-making platform, Chicago-based OptionsCity Software has helped professional traders make markets and trade on the world's leading derivative markets since 2006. OptionsCity continues to innovate with the development of Freeway, a low-latency server-based algorithmic trading platform designed for deploying user-built multi-asset strategies. No matter the choice, OptionsCity products are built on power, speed and reliability that traders require to have full control over trading, safety and risk management. OptionsCity is a certified Independent Software Vendor on 15 leading derivative exchanges. Learn more at www.optionscity.com
